

```
public static String compute(String input) {  
    String a = "";  
    String b = "";  
    for(int i = input.length() - 1; i >= 0; i--){  
        a = input.charAt(i) + a;  
        b = b + input.charAt(i);  
    }  
    return a + b;  
}
```
