

The diagram illustrates a sequence of numbers: 2, +2, -6, +3, +9, -4, +4, =, ?. Each number is accompanied by a colored dot. The dots are connected by lines of varying colors and thicknesses, suggesting a flow or relationship between the terms. The colors transition from dark grey for the first two terms, through shades of purple and pink, to orange and yellow for the final terms. The lines also follow this color gradient, with some being thicker than others, possibly indicating different weights or types of connections.

$$2 + 2 - 6 + 3 + 9 - 4 + 4 = ?$$
