

```
public static int[] compute(int[] numbersArray) {  
    for (int i = 0; i <= numbersArray.length / 2 - 1; i++) {  
        int tmp = numbersArray[i];  
        numbersArray[i] = numbersArray[numbersArray.length - 1 - i];  
        numbersArray[numbersArray.length - 1 - i] = tmp;  
    }  
    return numbersArray;  
}
```
