

```
public static int compute(int a, int b) {  
    int result = 1; int b;  
    for(int i = 1; i = a * b, i++){  
        if(i%a == 0 && i%b == 0){  
            result = i;  
            break;  
        }  
    }  
    return result;  
}
```
