

```
public static String compute(String input) {  
    String s1 = "";  
    for(int i = 0; i < input.length(); i++){  
        if(i%2 == 1){  
            s1 = s1 + input.charAt(i);  
        }  
    }  
    return s1;  
}
```
