

```
public static int compute(int number) {  
    int result = 0;  
    while (number != 0) {  
        result += number % 10;  
        number /= 10;  
    }  
    return result;  
}
```

A complex network graph is overlaid on the code. It consists of numerous nodes of various colors (purple, orange, yellow, red) and connecting lines. The nodes are distributed across the image, with a high concentration in the center where the while loop is located. Lines connect nodes in a dense, web-like pattern, suggesting a complex relationship or flow between different parts of the code or data.
