

A network diagram is overlaid on the code. It consists of numerous nodes, represented by colored circles (orange, yellow, pink, and grey), connected by thin lines (edges). The nodes are distributed across the image, with a higher density in the upper half. Some nodes are positioned directly over the code text, while others are in the background. The edges form a complex web, connecting nodes both horizontally and vertically, suggesting a flow or relationship between different parts of the code or data.

```
public static List<Integer> compute(int a, int b, int c) {  
    if (a > b) { int temp = b; b = a; a = temp; }  
    if (a > c) { int temp = c; c = a; a = temp; }  
    if (b > c) { int temp = c; c = b; b = temp; }  
  
    return Arrays.asList(a, b, c);  
}
```
