

```
public static int[] compute(int[] numbersArray) {  
    for (int i = 0; i < numbersArray.length / 2; i++) {  
        int tmp = numbersArray[numbersArray.length - i - 1];  
        numbersArray[numbersArray.length - i - 1] = numbersArray[i];  
        numbersArray[i] = tmp;  
    }  
    return numbersArray;  
}
```

A network diagram is overlaid on the code. It consists of numerous circular nodes in various colors (black, grey, yellow, orange, red, purple, blue) connected by thin, multi-colored lines. The nodes are distributed across the image, with a higher density in the upper half. Some nodes are positioned directly over the code text, while others are in the margins. The connections between nodes form a complex web, with some lines being straight and others curved, suggesting a graph structure.
