

An abstract graphic featuring a series of colored dots (purple, pink, orange, yellow) connected by thin lines, creating a network-like pattern. The dots are arranged in a way that suggests movement or flow, with some lines crossing each other. The colors transition from dark purple at the top to bright yellow at the bottom.

The cold, crisp mornings of autumn may reveal a thin white covering on lawns, pavements, rooftops, and automobiles. The covering is ice formed from water that has condensed out of the air and frozen. This frozen condensation is the searched term, and it is regarded by most people as a lovely sign that winter is on its way. For the farmer, however, it may be viewed as a sign of disaster. If crops are not yet harvested, they can be damaged.
